

Lord FL 2020

What do you really know? You feel you have stronghold. Why not exploit it? Tell me about your stronghold. Who do you have for hire? Who are your hirelings?

When you reveal the sound, you go in the right direction from there.

When your mother is calling you, you listen. She will tell you, and you'll listen. It is the same with beats.

It's like listening for The Lord.

When you are ready to listen, many teachers appear.
A few beats, and you'll see who's in the grass.

Are you ready now?

Download FL Studio 10. Don't get the new sh*t. Get the basics.

6 is really the one. Who can get 6 now?

I have a copy of 6. Get a hold of 6, and you'll have saved the planet.

10 is ok.

Get 10, and begin to make beats on this schedule. If you want to know how, ready my book Beginning FL Studio. BFS is available at Smashwords.com.

When you get the basics and start making beats, make 3 a day.

Don't judge them, just make them.

When you make enough for 5 days, you should have 15.

Of these 15, sift through and get about 3. Three of the tightest ones.

When you get three tight beats, save them to the side. Work with them.

Now, all the other beats are like little scraps you can do anything with.

If you make cartoons, you can put the beats in a cartoon.

If you make DJ mixes you can put the beats in mix.

If you like to talk, you can put the beats behind some talking and upload a Youtube.

Then, make sure you save all your beats on a CD. The CD is fragile, but you get to keep every bit of the sound in an unalterable way. It's like crystalizing your Grandmother. You want to do

that.

Find a place to put all the CDs. Don't wait on this. Look for a cabinet or file cabinet, drawer, to put your CDs in.

I recommend black sleeves, and put the cds in fresh with no label or marker. Just mark the sleeves. This is the cleanest way, and insures if anyone finds the stash, they will not really know what to do.

This also means you are building up a sonic treasure.

To start, Save all your beats to wrap the remainder. When you get export, the option is on the left of the box.

The End.

Lord Thank You.
